

## Weekly Water Quality Report

July 30, 2024

### E. coli Risk Levels

Low Risk: **Green** <126\*

Moderate Risk: **Yellow** 127-406\*

High Risk: **Red** >406\*

\* E. coli per 100ml

Area	Color Code	E. Coli Level
D-River	Green	79.6
Devils Lake Campground	Green	6.3
Regatta Park	Yellow	129.6
Holmes Rd. Park	Green	7.5
Sand Point Park	Green	34.5
K-Street Park	Green	10.9
Brown Bear State Park	Green	11.9
Mouth of Rock Creek	Green	10.7
Mouth of Thompson Creek	Green	18.5
Blue Heron Landing	Yellow	204.1
Mid-Lake	Green	5.2

Each week during the recreation season the Devils Lake Water Improvement District tests and monitors the waters of Devils Lake for E. coli and Harmful Algal Blooms. DLWID staff conducts weekly samplings to keep residents and users of the lake informed.

It is important to keep in mind that E. coli is a natural part of the lake system. Humans have naturally occurring E. coli bacteria in their intestines, but people and animals alike can become infected with the strand of E. coli O157:H7 that commonly occurs in undercooked foods, contaminated water, and feces. This data is informational only and does not indicate a closure or an actual advisory but is posted here to serve as a guide to water quality in and around Devils Lake.
