Communications Report

The quarterly communications report is in progress and will shortly be produced and distributed. General topics will include but are not limited to the following:

1. Herbicide treatments for nuisance submerged aquatic vegetation
2. Meetings in early June with ODFW regarding the re-introduction of sterile grass carp in Devils Lake
3. EPA, DEQ, ODFW sampling event for National Lakes Assessment, work to begin during last week of June
4. D River Dredging permit update
5. Status of marina property, potential date to re-open to the public
6. E. coli update and summary from previous years

Devils Lake Conservation/Aeration Project

All equipment is fully operational and maintained per schedule

Devils Lake Aquatic Vegetation Management

Herbicide treatments for nuisance submerged aquatic vegetation beginning 6-13-2022

Meeting with ODFW regarding the potential re-planting of sterile grass carp in Devils Lake

Devils Lake Flood Protection

Campbell Environmental is currently completing the Corps/DSL/DEQ permit Biological Assessment. They are coordinating with Civil West to provide a design drawing for the temporary sediment laydown storage pad, due West of the D River outlet. This sediment pad location drawing is due by mid-June. A Coordinating meeting with DLWID, Campbell, and Civil West was held on 5/10/22. Another coordinating meeting between the parties will be held during June.

ACTION ITEMS

Civil West to complete design for sediment laydown pad.

Water Quality Briefing

Dissolved oxygen levels remain high lake wide. No problematic algae have been identified within the water column.

E. coli general update and discussion summary, there has been a major reduction in detections since the installation of the aeration system

New Business

Meetings with ODFW regarding the re-introduction of sterile grass carp in Devils Lake, the first meeting with ODFW is in Newport next week, **6-9-2022**
