

Weekly Water Quality Report

June 5, 2024**

E. coli Risk Levels

Low Risk: **Green** <126*

Moderate Risk: **Yellow** 127-406*

High Risk: **Red** >406*

* E. coli per 100ml

Area	Color Code	E. Coli Level
D-River	Yellow	387.3
Devils Lake Campground	Green	78.9
Regatta Park	Green	83.9
Holmes Rd. Park	Green	114.5
Sand Point Park	Green	73.3
K-Street Park	Yellow	129.6
Brown Bear State Park	Green	38.4
Mouth of Rock Creek	Green	58.3
Mouth of Thompson Creek	Yellow	172.3
Blue Heron Landing	Green	107.6
Mid-Lake	Green	51.2

**Water samples taken following heavy rain fall and excess nutrients in water system.

Each week during the recreation season the Devils Lake Water Improvement District tests and monitors the waters of Devils Lake for E. coli and Harmful Algal Blooms. DLWID staff conducts weekly samplings to keep residents and users of the lake informed.

It is important to keep in mind that E. coli is a natural part of the lake system. Humans have naturally occurring E. coli bacteria in their intestines, but people and animals alike can become infected with the strand of E. coli 0157:H7 that commonly occurs in undercooked foods, contaminated water, and feces. This data is informational only and does not indicate a closure or an actual advisory but is posted here to serve as a guide to water quality in and around Devils Lake.
