

Weekly Water Quality Report

August 23, 2024

E. coli Risk Levels

Low Risk: **Green** <126*

Moderate Risk: **Yellow** 127-406*

High Risk: **Red** >406*

* E. coli per 100ml

Area	Color Code	E. Coli Level
D-River	Green	56.1
Devils Lake Campground	Green	38.4
Regatta Park	Yellow	95.9
Holmes Rd. Park	Green	1.0
Sand Point Park	Green	2.0
K-Street Park	Green	9.6
Brown Bear State Park	Green	31.3
Mouth of Rock Creek	Green	23.5
Mouth of Thompson Creek	Green	25.6
Blue Heron Landing	Yellow	9.6
Mid-Lake	Green	2.0

Each week during the recreation season the Devils Lake Water Improvement District tests and monitors the waters of Devils Lake for E. coli and Harmful Algal Blooms. DLWID staff conducts weekly samplings to keep residents and users of the lake informed.

It is important to keep in mind that E. coli is a natural part of the lake system. Humans have naturally occurring E. coli bacteria in their intestines, but people and animals alike can become infected with the strand of E. coli O157:H7 that commonly occurs in undercooked foods, contaminated water, and feces. This data is informational only and does not indicate a closure or an actual advisory but is posted here to serve as a guide to water quality in and around Devils Lake.
